COMPETENCY	DESCRIPTION			
Planning and Organising	Developing, implementing, evaluating and adjusting plans to reach goals, while ensuring the optimal use of resources			
Behavioural Indicators				
NOVICE: <i>Fails to plan and organise own activities</i>	DEVELOPING: <i>Plans and organises own activities</i>	PROFICIENT: <i>Plans and organises group activities</i>	HIGHLY PROFICIENT: <i>Plans and organises multiple, complex activities</i>	MASTERY: <i>Plans and organises at a strategic level</i>
○ Undertakes activities without planning them or without adhering to pre-determined standards or procedures. ○ Does not prioritise work or approach these in an ad-hoc manner. ○ Does not check the accuracy of own work.	○ Plans and organises own activities to accomplish pre-determined standards or procedures. ○ Seeks clarity on priorities as needed. ○ Monitors the quality and timeliness of own work. ○ Responsibly uses the resources at one’s immediate disposal.	○ Identifies who needs to be involved and when. ○ Identifies who will do what, and when, taking into account group members’ skills, needs and, if possible, preferences. ○ Sets timelines and work steps. ○ Monitors progress and use of resources (people, supplies, money). ○ Makes needed adjustments to timelines, steps, and resource allocation.	○ Identifies and prioritises resources across initiatives/programs. ○ Ensures that activities are not duplicated. ○ Ensures that systems are in place to make available the information needed to monitor and evaluate progress and use of resources (e.g., financial, non-financial, historical and prospective information). ○ Ensures coordination, as needed, across related projects. ○ Works on various projects and navigate innovation and change across projects. ○ Derives meaning and insight from unstructured information.	○ Determines and communicates objectives, priorities and strategies that provide direction for the organisation. ○ Secures and allocates programme or project resources in line with strategic direction. ○ Ensures that programmes are monitored to track progress and optimal resource utilisation, and that adjustments are made as needed. ○ Ensures that outcomes are evaluated.

PROMOTE INNOVATION CULTURE				
COMPETENCY	DESCRIPTION			
Creative Problem Solving	Ability to identify problems, their root causes, interrelations between problems and find creative solutions to them			
Behavioural Indicators				
NOVICE: Struggles to solve problems	DEVELOPING: Analyses the situation and solves basic problems	PROFICIENT: Solves standard problems	HIGHLY PROFICIENT: Solves complex problems	MASTERY: Solves broad, highly complex problems
○ Overwhelmed by problems. ○ Fails to identify the root causes of problems. ○ Blindly adheres to rules or procedures when solving problems, without weighing the merits of the situation. ○ Offers solutions that do not address the root cause of the problem.	○ Follows a logical process to analyse problems and find their root causes. ○ Identifies the problem based on a limited number of clear and basic factors. ○ Selects the solution from predefined options, using clear criteria/procedures. ○ Verifies that the problem has been solved. ○ Involves others when making complex decisions.	○ Identifies the problem based on a range of factors, most of which are clear. ○ Uses simple problem-solving techniques to generate solutions, e.g. brainstorming. ○ Identifies an optimal solution based on weighing the advantages and disadvantages of alternative approaches. ○ After implementation, evaluates the effectiveness and efficiency of the solution.	○ Identifies the problem based on a broad range of ambiguous factors, ○ Sees interrelatedness of problems and their impact on the organisation. ○ Anticipates and takes action to avoid an approaching problem that might interfere with effective service delivery. ○ Identifies alternative solutions, including some that are not based on precedent. ○ Monitors impact and evaluates the effectiveness and efficiency of the solution after it has been implemented and makes needed changes for maximum effect. ○ Leverages analytics and technology to modernize the organisation through creative problem solving.	○ Identifies broad-based complex problems, understands their systemic nature and their impact on the organisation and its processes and outputs. ○ Applies systems thinking and other well-developed problem-solving techniques to resolve highly complex and strategic problems that save the organisation from deep trouble or position it strategically for excellence. ○ Develops monitoring and evaluation mechanisms to assess the solution’s effectiveness. ○ Develops policies and procedures to deal with recurring problems.

STRATEGIC OPERATIONAL PROCESSES				
COMPETENCY		DESCRIPTION		
Bimodal IT Practice		The practice of managing two separate, coherent modes of IT delivery in the digital transformation context, one focused on stability and the other on agility.		
Behavioural Indicators				
NOVICE: Have <i>Elementary understanding of bimodal approach to IT but not able to implement actions.</i>	DEVELOPING: <i>Adapts personal work goals, actions and methodologies to implement the bimodal IT approach</i>	PROFICIENT: <i>Able to direct team goals, actions and methodologies to implement the bimodal IT approach</i>	HIGHLY PROFICIENT: <i>Influences strategic direction to implement organization goals, actions and methodologies to implement the bimodal IT approach</i>	MASTERY: <i>Shapes the vision and strategies and values of the organization to implement the bimodal IT approach</i>
○ Has adapted personal development plan to learn the bimodal IT principles, methodologies ○ Basic understanding of how traditional legacy systems will be impacted by new age solution development methodologies ○ Basic understanding of agile practices ○ Basic understanding of digital transformation principles	○ Able to understand how to respond to the bimodal IT impacts on own work deliverables ○ Proficient in implementing agile solution development ○ Provide feedback from the customers to the solution development teams in both bimodal modes	○ Able to switch team task focus concurrently between solution delivery modes requiring either stability, accuracy and safety and exploratory, non-linear, agility and speed ○ Enables experimentation on both traditional and new age IT solutions development practices using a risk-based perspective. ○ Able to deploy iterative solution development practices such as DevOps, adaptive sourcing, sense and response capability from the field to solution development teams.	○ Enables executives to evaluate competing projects, how projects are funded and changes the executive interpretation of risk ○ Adapts and expand capabilities concurrently between the bimodal modes ○ Enables and absorb change and disruption in the bimodal modes appropriately through management of culture and governance required to drive successful outcomes.	○ Enables enterprise bimodal approach and capabilities ○ Strategically directs enterprise business solutions within both the bimodal modes ○ Establishes clear and transparent governance principles and the filters to determine the bimodal mode for the business & IT strategies to achieve outcomes.

STRATEGIC OPERATIONAL PROCESSES				
COMPETENCY	DESCRIPTION			
Managing People and Driving Performance	Ability to create an environment that is enabling and empowering others to contribute successfully to the organisation			
Behavioural Indicators				
NOVICE: <i>Takes little or no initiative to empower self and others to perform and contribute to organisational goals</i>	DEVELOPING: <i>Empowers self to perform and contribute to organisational goals</i>	PROFICIENT: <i>Contributes to others’ empowerment to reach organisational goals</i>	HIGHLY PROFICIENT: <i>Creates an environment where others can flourish and be empowered to perform</i>	MASTERY: <i>Provides strategic platform to create an empowering and inspiring environment in the organisation</i>
○ Fails to identify and address performance issues. ○ Challenges people about their performance inappropriately and/or inconsistently. ○ Places blame and provides no support for failure.	○ Displays a sense of ownership and displays creativity and proactive behavior. ○ Takes steps to empower self, through study or participation in stretching projects. ○ Takes pride in own and the organisation’s accomplishments.	○ Stretches self and others to achieve goals. ○ Takes steps to develop self and encourages development of other employees. ○ Inspires individual creativity and initiative and inspires all to do their best. ○ Encourages healthy competition inside the organisation. ○ Reviews peers’ performance and let peers review his/her performance and strives for peer respect. ○ Encourages creative, learning and lateral thinkers.	○ Enforces a consistent responsibility structure with clear roles and accountabilities and incentive structure. ○ Implements flexible and user-friendly systems throughout the organization. ○ Balances challenging people with nurturing people. ○ Creates opportunities for employees to learn and learn from their mistakes or failures. ○ Demonstrates emotional intelligence to understand different points of view and take them into consideration. ○ Develops digital skill sets. ○ Connects media-savvy millennials with senior leaders to discuss the latest tech buzz and practice.	○ Develops strategies to empower others. ○ Helps to unblock obstacles, identifying and securing resources, and taking care of teams and of the individuals within them. ○ Develops strategy and goals bottom-up using input from people on all organisational levels. ○ Takes practical steps to unleash the organisation’s energies and collective capabilities to maximise workforce productivity. ○ Creates conditions to experiment with digitalisation.

STRATEGIC OPERATIONAL PROCESSES				
COMPETENCY		DESCRIPTION		
Decision-making		Ability to apply own judgement and make bold decisions in the context of varied levels of risk and ambiguity		
Behavioural Indicators				
NOVICE: <i>Fails to make important decisions and passes the buck</i>	DEVELOPING: <i>Makes decisions within the available guidelines and policies</i>	PROFICIENT: <i>Makes decisions by interpreting rules</i>	HIGHLY PROFICIENT: <i>Makes complex decisions in the face of ambiguity</i>	MASTERY: <i>Makes high-risk decisions in the face of ambiguity</i>
○ Shows reluctance to apply own judgement to reach decisions. ○ Hardly contributes to decisions and waits for others to make decisions. ○ Hides behind policies where own judgement is called upon to make decisions.	○ Applies explicit guidelines and procedures in making decisions. ○ Makes straightforward decisions based on adequate information. ○ Deals with exceptions using clearly specified rules. ○ Makes decisions involving little or no consequence of error.	○ Applies guidelines and procedures that require some interpretation in dealing with exceptions. ○ Makes straightforward decisions based on information that is generally adequate. ○ Makes decisions involving minor consequence of error. ○ Seeks guidance as needed when the situation is unclear.	○ Makes complex decisions for which there is no set procedure. ○ Considers a multiplicity of interrelated factors for which there is incomplete and contradictory information. ○ Balances competing priorities in reaching decisions. ○ Considers the benefits and impact of decisions on other areas of the organisation. ○ Willing to take risks and accountability to manage the impact/ results of decisions.	○ Makes high-risk strategic decisions that have significant consequences. ○ Uses principles, values and sound business sense to make judgement and reach decisions. ○ Makes decisions in a volatile environment in which the weight given to any factor can change rapidly. ○ Reaches decisions assuredly and confidently in an environment of public scrutiny.

STRATEGIC OPERATIONAL PROCESSES				
COMPETENCY	DESCRIPTION			
Responding to Change and Pressure	Is flexible and adapts positively, to sustain performance when the situation changes, workload increases, tensions rise or priorities shift			
Behavioural Indicators				
NOVICE: <i>Fails to recognise the need to change</i>	DEVELOPING: <i>Implements change initiatives in own area</i>	PROFICIENT: <i>Identifies & assesses need for change in line with organisational goals</i>	HIGHLY PROFICIENT: <i>Evaluates change initiatives and advocates for change, develops change models</i>	MASTERY: <i>Leads organisational change</i>
- Shows little appreciation of the need to change. - Resists or opposes organisational change initiatives. - Attempts to influence others negatively towards organisation- initiated change.	- Follows existing policies and change processes and applies change in own area. - Adapts processes and ways of working to give effect to change and new applications/systems. - Provides feedback on the impact of change to seniors. - Displays a positive attitude in the face of ambiguity and change.	- Identifies new trends that impact on the organisation and makes recommendations for change. - Defines the requirements and quantifies the business benefits to implementing change or new systems. - Assesses the implications and impact of new technology solutions on current practices and adjusts systems or processes accordingly. - Analyses costs and benefits of implementing new technology solutions.	- Recognises and responds quickly to shifting opportunities and risks. - Evaluates change requirements and exploits specialist skills to identify possible new methods and standards that can be used. - Develops a plan for implementation of change and process enhancement. - Manages the change considering structural and cultural issues.	- Anticipates and capitalises on emerging opportunities and manages risks for the organisation. - Provides leadership to plan, manage and implement significant technology-led business changes. - Applies pervasive influence to embed organisational change. - Considers and minimises the impact of changes in the industry or in general, on the organisation and its people/stakeholders - Creates a learning organisation.

STRATEGIC OPERATIONAL PROCESSES				
COMPETENCY	DESCRIPTION			
Strategic Thinking	Understands and processes complex information and exercises sound judgment, considering the situation, the issues, the key players, and levels of hierarchy involved. Proposes course of action that further the objectives, priorities and vision of the organisation			
Behavioural Indicators				
NOVICE: Fails to align actions and plans to the vision	DEVELOPING: Aligns personal work goals and actions to the vision	PROFICIENT: Aligns team goals and actions to organisational vision	HIGHLY PROFICIENT: Influences vision and strategic direction	MASTERY: Shapes the vision and strategies and values of the organisation
○ Focuses on the here and now. ○ Fails to think of long- term implications of issues. ○ Works with operational issues where there are clear guidelines and structures. ○ Depends on others to ensure alignment with the business goals and vision of the organisation.	○ Able translate strategic goals to operational goals in own area. ○ Continually evaluates personal progress and actions to ensure alignment with organisational vision and operational goals. ○ Demonstrates understanding of how own role assists in achieving the organisation’s vision. ○ Focuses on short-term issues.	○ Applies strategic thinking concepts to articulate organisational strategies that are aligned to the vision. ○ Helps team members understand the broader vision and how their work relates to it. ○ Scans external and internal environments to identify and assess emerging trends, opportunities and threats that may influence future directions. ○ Able to implement business process management.	○ Able to develop new business models ○ Shows strong strategic inclination and understands relationships between and within dynamic systems and uses this to formulate strategies that are aligned with organisational vision and mission. ○ Defines issues, using theoretical models, generates options and selects solutions that are consistent with strategy and vision. ○ Maintains a broad, strategic perspective while identifying and focusing on crucial details. ○ Spots patterns and bring thinking from multiple perspectives together. ○ Develops new approaches to learning, rewards, use of space and elimination of hierarchies.	○ Shows high level of strategic thinking and futuristic orientation. ○ Defines and continuously articulates the vision and strategy in the context of wider government priorities and ambiguity. ○ Structures and positions the organisation to government priorities as a significant player in the industry. ○ Exploits existing and emerging technologies for better business outcomes.
